

## **Sunrise Commodity Update: July 2007**

**Sugar:** Sugar prices continue to trade in a narrow range but significantly lower than 12 to 18 month ago.

**Corn Syrup:** In the last 2 years corn syrup prices are up dramatically. The announcement of the 2007 corn crop indicates the largest planting intentions in the last 50 years. When this was announced prices per bushel fell from over \$4.00 per bushel to \$3.50. Since that time, prices have gone up.
